

NEOPEC Grant Information

NOPEC-sponsored municipality grants supporting energy conservation and efficiencies are now being accepted.

At the March Council Meeting, Mayor Licastro referred the project to Public Improvements and, in turn, committee member Andy Kesselem will work alongside resident Laura Bacci and Village Engineer Don Bierut on the grant submittal.

If you have an idea or ideas, we'd love to hear from you! Deadline for ideas: **July 31, 2010**. While there is no guarantee that all ideas will qualify or be funded, please provide as much information as possible such as: outline the project, describe any community benefits, identify key steps and detail costs if known.

Since this is a volunteer effort, we need to set deadlines so we can move this opportunity forward. Our internal submittal date is targeted for Sept. 24, 2010. So there's a lot of work ahead of us.
