MS. BURKE-JONES: I'll call the Public Improvements Committee to order and call the roll.

MS. COOKS: Mr. Benjamin?
MS. BURKE-JONES: Mr. Benjamin is not on it. It was Rod Taylor.

MS. COOKS: So Mr. Yonchak?
MS. BURKE-JONES: Yes.

MS. COOKS: My apologies. So Ms. Burke-Jones.

MS. BURKE-JONES: Aye.

MS. BURKE-JONES: I wanted to welcome our newest member of the Public Improvements Committee. It's great to have you join us.

So I'm going to ask approval of the prior meeting minutes. That meeting was on October 7th. So Keith, you were on, but cannot approve it. I do see someone over there. Gina.

MS. HUFFMAN: Yes.

MS. BURKE-JONES: Did you have a chance to review those minutes?
This time, Mr. Bierut is recommending we do a curb-to-curb resurfacing that, rather than patching it, because the patching just turns out to be problematic. It's a patch here, it sinks there. You patch there, it sinks here. They also looked at other areas of the Village for road repair.

I've asked Ms. Cooks to ascertain how much we can use from both restricted funds and from the general fund to see if, indeed, we can do all the projects, but our priority, according to Mr. Bierut, will be Eddy Road.

Don, why don't you comment on that.

MR. BIERUT: Yeah, you touched on it.

We have problems with sinking pavement and patches that have been going on as long as I can remember, combined with manholes that are a little bit unstable. So the plan is to mill or strip off two or three inches of the asphalt, addressing the failed pavement underneath and resurface the same amount of asphalt over the top. And that would go from Lake Shore down to the southern end, Cleveland. There's also miscellaneous patchwork on Lake Shore Boulevard that we looked at that we'd like to include in the program.

And what I'd like to do, if the committee recommends it or allows it, is just to go for bid for this program. Pricing is difficult these days. Especially asphalt prices as they come up and come down. I really would like to get the advertisement out there, receive the bids to see what we're talking about cost-wise.

MS. BURKE-JONES: Can I ask where again are we going to be taking those dollars from?

MS. COOKS: I was just asked today.

MS. BURKE-JONES: It's always nice to know if you have the money in order to pay for it.

MS. COOKS: Well, as you know, we just -- on pay claims we currently owe, and that's the road salt, that was 150 ton. If we need the additional tonnage, which I hope we don't before the end of the year, it would need to snow an awful lot. We try to reserve some for additional salt if we need that. Right now, the balance in streets is about $18,000, so it will be from several different accounts.

MS. BURKE-JONES: So we're looking for

from the general fund.

MS. COOKS: First we always look to use the restricted fund that will allow for whatever purpose, then we move to the general fund.

MS. BURKE-JONES: Okay.

MAYOR LICASTRO: Joyce, we anticipate that this is an estimate, that if we're able to do everything, it should not exceed 100,000, but it's 70,000 of that for Bratenahl Road.

MR. BIERUT: Mayor, if I can interrupt and add I think the bid document is set up so you can break it out into two, three, four separate things or any and all and see how the pricing comes in. If we can only do Bratenahl Road and some of the patching for patching not Bratenahl Road, we'll still have funds available to us.

MS. BURKE-JONES: I understand that.

That makes a lot of sense. The committee understands it. Good.

MR. BENJAMIN: I would support going out to bid until we know what the baseline is and what we're doing with it in terms of the current economy. And I like your idea of doing the bid alternates. And if these bids come in too high, there might be one project we can do and another

we can bid over the winter when hopefully contractors are being a little more aggressive in their pricing.

MR. BIERUT: The pricing I've seen comes down a little bit, but there's no rhyme or reason.

MS. BURKE-JONES: So you would anticipate if we are behind this recommendation, that this would occur sometime before winter.

MR. BIERUT: Certainly. We can advertise as soon as next week and hopefully award it by the September meeting.

MS. BURKE-JONES: Okay. Good. Can I have a recommendation? Yes, Gina.

MS. HUFFMAN: So I just want to make mention, and this is going to be applicable to what we're talking about now, but in the future for public improvements, Chairwoman, can we --

MAYOR LICASTRO: Can you speak into the microphone, Gina?

MS. HUFFMAN: In the future, I know this isn't applicable to right now, but in the future Chairwoman for Public Improvements, can we make sure that we include and if it has not already been, too, Mayor, the easterly streets in

Molnar Reporting Services, LLC  (440) 340-6161
Bratenahl on Lake Shore Avenue, which I don't
know what their needs are in terms of things.

MAYOR LICASTRO: They do. That's what
they did today. They toured the entire Village.
Our focus always seems to be the west end. The
soil condition of Bratenahl differs from the east
end is clay. Coit Road is beautiful soil that
grows beautiful tomatoes. If you'd like some,
let me know. The west end is all sand. So
inevitably we have more sinkage and sinkholes and
issues on the west end.

What we're presenting today, Ms.
Huffman, is their recommendation having looked at
the entire Village. Eddy Road is probably the
worst, but thankfully we have other monies to
deal with Eddy Road.

MR. BIERUT: On some of the residential
streets on the west end that were done probably
20 years ago now, they're starting to need
attention as well. Recognize that.

MS. HUFFMAN: I understand what we're
talking about. I just want to make sure we keep
that on our radar.

MAYOR LICASTRO: Absolutely. Again, for
example, the new pavement west of Bratenahl Road,

MR. BIERUT: The activity on the DFAS site at the west end of
the property in what is a stream or repairing a
corridor or drainage ditch. I was on -- we
did, because I just blacktopped my apron and I
parked overnight on Holden and the gate was open
at the end of Holden. And just from what I've
seen, I thought I would ask the question.

MAYOR LICASTRO: May I comment on that?

MS. BURKE-JONES: Yes.

MAYOR LICASTRO: We, too, have noticed
the pressure on some of the asphalt and it's kind of
moving. But when they do this, it's going to be
the entire Village. We're lucky that some of the
side streets were done 20 years ago recently,
probably not. We do as much as we can given the
funds we have available.

MS. BURKE-JONES: I recognize some
comments about this particular issue.

MR. BENJAMIN: Yes.

MS. BURKE-JONES: First, I'm going to
ask Keith -- then I'll ask Keith.

MR. BENJAMIN: Yeah. So over on Lake
Shore on the western side by Cushing Lane, is
that what you're referring to? There's sort of
stretch marks that is coming up there?

MAYOR LICASTRO: Yes. The buses do that
at speed, probably not 25. And the weight of the
buses moves the asphalt that direction.

MS. BURKE-JONES: Keith, you had a
question.

MR. GALESTOCK: I have a question and a
comment. Did you give an assessment or look at
Holden Lane? And where does that fall in the
plan for street works?
because they were bringing in heavy equipment to
do that project.

MR. BIERUT: Mayor, I could add Holden, as a rule, gets less traffic than a lot of streets, but if they're going to be using that as a haul road, the traffic is going to be things like you saw, which is an important point. We can argue that you don't use the street very much with DFAS, but you're using it in a manner that's harming it and we'd like you to participate in the maintenance of it.

MAYOR LICASTRO: We don't really know the scope of the project. We don't know when it began, when it's going to end. We're really in the dark, which is unfortunate, but we have reached out and asked for clarity on the project itself and how it would indeed impact that road. So we'll figure that out.

MR. GALESTOCK: Thank you.

MS. BURKE-JONES: Any funds that we can get from others, we should pursue if we can.

Great idea, Keith. So you are going to recommend that we get behind the approval for the curb-to-curb renovation of Bratenahl Road, repavement of Bratenahl Road.

Molnar Reporting Services, LLC (440) 340-6161

MR. BENJAMIN: The bid, to go out for the bid.

MS. BURKE-JONES: To go out for bid for Bratenahl Road, as well as patching.

MR. YONCHAK: Second.

MS. BURKE-JONES: And you did the initial?

MS. HUFFMAN: So moved.

MS. BURKE-JONES: Great. All those in favor.

Ayes: 3. Nays: 0.

MS. BURKE-JONES: Great. It passes.

We'll be moving this forward at the council meeting.

MAYOR LICASTRO: We'll ask for a motion.

As Don anticipates, we should hopefully have bids back for this committee to consider before our meeting in September.

MS. BURKE-JONES: Great.

MS. HOEFLING: I have a question.

Didn't we do sidewalks last year?

MR. BIERUT: Yeah, we did. Maybe I should back up a little bit. We did, but not many. The Service Director was really good today. I think we came to the agreement that we were going to go for the sidewalk project.

MS. MEADE: For this issue when you were talking about sidewalks, when people attended Bratenahl Day, if they were walking toward Village park, so if it's north of the driveway, the sidewalks, I mean, there are sidewalks that probably have an inch differential and it's very, very hazardous. So I don't know if they hit that area for sidewalks or not. There were three or four others that I was helping with this, and then I put that on my calendar.

1. There's no reason to panic. This is very typical for this time of year. That's why I put out the memo of the Board of Health encouraging people to eliminate standing water, et cetera, et cetera, which the Board of Health has already been treated. MS. BURKE-JONES: Good. Thank you. That's good. Well, thank you. And that was it for your updates?

MAYOR LICASTRO: Yes, that's what Don and I have, yes.

MS. BURKE-JONES: Great. I see some questions here. Are they referring about further -- the same issue or other items?

MS. MEADE: One is and one isn't.

MS. BURKE-JONES: This issue. On this issue. Pick up other items.

MS. MEADE: For this issue when you were talking about sidewalks, when people attended Bratenahl Day, if they were walking toward Village park, so if it's north of the driveway, the sidewalks, I mean, there are sidewalks that probably have an inch differential and it's very, very hazardous. So I don't know if they hit that area for sidewalks or not. There were three or four others that I was helping with this, and then I put that on my calendar.

Molnar Reporting Services, LLC (440) 340-6161

MS. MEADE: I just don't remember -- it's been a while. I don't remember something being brought forward last year for that.

MR. BIERUT: What we've done in the past is typically the catch basin repairs are done by a concrete contractor. Oftentimes you had that same contractor do the sidewalk work at the same time.

MS. BURKE-JONES: All right.

MAYOR LICASTRO: May I as a quick aside reminded myself, you also saw on pay claims a charge to the Board of Health for mosquito larvicide. We have treated with their help all the catch basins, which, of course, retain water, to try to reduce the mosquito population, because Bratenahl is one of the communities where they found a mosquito with West Nile.
that you see that we can do.

1 MAYOR LICASTRO: I don't think any of
2 mandated to spend before the end of this year. I
3 think '23 is when -- we have a window of time for
4 '23, so we don't have to panic.
5 MS. BURKE-JONES: Let's just check.
6 MAYOR LICASTRO: Your comment earlier,
7 whatever funding we can use that doesn't come
8 from our pockets we always prioritize.
9 MS. BURKE-JONES: Right. And I
10 understand that. We're at a point we need to be
11 spending those dollars.
12 MS. COOKS: If I remember correctly, we
13 probably need to escrow 2022, October 31st.
14 MS. BURKE-JONES: Exactly. That will be
15 coming up as well.
16 MAYOR LICASTRO: Once the monies are
17 escrowed, it really lengthens the window of time
18 in which we can use them.
19 MR. BENJAMIN: Three years. Once you
20 escrow it, you have three years.
21 MS. BURKE-JONES: Those three years pass
22 really fast. We've got facilities that -- let's
23 ensure the facilities are going to be around.
24 MR. BENJAMIN: But also, if there is a
25 Molnar Reporting Services, LLC (440) 340-6161

1 of thing we're talking about grinding that off
2 and smoothing it off.
3 MS. HOEFLING: Okay.
4 MAYOR LICASTRO: That's a cheaper
5 alternative than replacing panels. So we'll look
6 at that first.
7 MS. BURKE-JONES: So let's see, I just
8 was reviewing our October 7th meeting. And Bob,
9 you weren't there at that meeting, but, Gina, you
10 were. So some issues we talked about at that
11 time and I wanted to follow up with those issues.
12 And one of the things we talked about was the
13 NOPEC grant and the dollars that we were going to
14 be getting at that time. And have we spent any
15 of those NOPEC dollars this year on any projects?
16 MS. COOKS: I don't have anything.
17 MAYOR LICASTRO: So monies from NOPEC
18 grants are in escrow. We have a certain period
19 of time in which to spend them. They're rather
20 liberal in the manner we can spend them, but I'm
21 not sure we've used any to date.
22 MS. BURKE-JONES: Can you have our
23 people obviously check and see how much we're
24 going to lose if we don't spend them by the end
25 of this year and then make any recommendations

Molnar Reporting Services, LLC (440) 340-6161
the pandemic about transferring funds. Generally that they were very lenient during the height of way if they approved it or not.

2020 we probably have a UL address for someone, will not be returning to the office.

necessary materials. And it's quite likely they was sent to them in a packet with all of that whole -- that kind of

administration contract. So I can understand why this building, which is up --

it's up in the air. We have last year asked the Ohio Tax Administrator if we could get transfer dollars in order to deal with an ADA access.

How does that stand?

MR. BENJAMIN: They have to go towards projects that positively impact energy efficiency or electrical. So if there's a pilot project involving solar lighting or even paying for upgrades in pole lighting around the community center or the new Village Hall, those are the kind of projects that the money can be used for.

MS. BURKE-JONES: That is what we actually spent. The community center added that, too. We did get NOPEC dollars for that, which is what funded our current Village Hall area lighting as well.

I see a question.

DR. SECURA: No, it's not a question.

It's about the sidewalks. I was at the event this last week. And someone escorted me to my car. It was getting dark, just before the fireworks. And she said, watch for that sidewalk, it's an inch higher, and I still almost fell. Are we going to wait until someone breaks their arm to repair these?

John, I hear about price, but when they tore up all our sidewalks and put them in the next day all along Lake Shore when the gas people...
that goes to Common Pleas Court to get funds
moved off of one restricted fund to another or to
general fund.

MAYOR LICASTRO: May I offer an opinion?
When we made the request, which was granted two
years before that, the response was rather
quickly. Now, COVID slowed everything down. But
I would think given the length of time, even with
them working remotely, I wouldn't count on those
dollars.

MS. BURKE-JONES: I think that we would
like to have an answer instead of just having it
hanging out there. Yes, Gina?

MS. HUFFMAN: Yes, but I have another
comment, but go ahead. We would like to know,
sure.

MS. COOKS: I would, too. I spent a
considerable amount of time putting that package
together.

MS. BURKE-JONES: Right.

MS. COOKS: I would like to know.

MAYOR LICASTRO: Given the fact it's
received so little attention, my conjecture is
don’t count those monies yet, but getting
something definitive, I agree, would be nice,

MR. BENJAMIN: If I may, on this issue,
initially we were taking money from the
recreation fund, the rec levy fund, to put toward
facility improvements, ADA accessibility here.
At least in my opinion, that conversation has
kind of changed now since we did not move forward
with putting the rec levy on. I think it’s
important that we really take a look at the rec
levy dollars that we have and make sure there’s
enough money there to provide actual recreation
services and programs for residents and look at
other alternatives or general fund dollars for
ADA accessible equipment or ramps or whatever
else we need, but I don't think we should touch
the rec levy fund until we figure out a long-term
plan for that. My opinion is that we let just go
to recreation.

MAYOR LICASTRO: Keith, that's a good
point. Remember, when we were successful in
moving funds from restricted to general is from
the capital improvement fund. It's a different
animal with recreation funds. Those were voted

MS. BURKE-JONES: But getting an answer
is good.

MAYOR LICASTRO: I agree with you.

MS. BURKE-JONES: And there are other
issues, too, in that ADA, especially that wasn’t
-- we were not going to fund with rec dollars was
the railings. And I know that you had comments
about the conditions of the railings.

MR. OREL: That's a question I’d like to
get into.

MS. BURKE-JONES: Yes, please. You have
a question?

MR. OREL: Yes, actually for going on
that, I'd like you to address my letter that I
sent to council and to the committee regarding
the emergency repairs that this facility needs.

MS. BURKE-JONES: Specifically do you
want to comment on railings first?

MR. OREL: I mean not all of it.

MS. BURKE-JONES: Just referencing your
letter specifically.

MR. OREL: Yes. But those are safety
issues.

MS. BURKE-JONES: Exactly. Has our
service department been able to review that
document, Mayor?

MAYOR LICASTRO: Not in its completeness
or totality. Don't forget we have a new Service
Director.

MS. BURKE-JONES: That's why I’m asking.

MAYOR LICASTRO: I think he needs some
time to really look at that and look at the
building and see what should be a priority.

MS. BURKE-JONES: I think that would be
really helpful for our committee. Do you agree,
Bob and Gina?

MR. YONCHAK: Yes. I don't recall the
letter.

MR. OREL: That was before you got here.

MR. YONCHAK: We have a study from DS
Architecture that makes recommendations and we
should consider along with that. I know we’re
spending money. Everyone loves to spend money, but we don't have money to do all this stuff, but the feasibility study I think perhaps, Mark, says we should look at them and prioritize which ones are needed and which ones maybe get estimates and prioritize it, putting it into funds what can be done just to provide the Band-Aid for this building that it needs while we make final decisions with -- I think this building is probably going to be around for a while, but I just think we should consider that. And we have this study. And invite other people who know about this building so we can discuss these improvements and prioritize them.

MAYOR LICASTRO: If I may.

MS. BURKE-JONES: Yes.

MAYOR LICASTRO: So you're aware I'm putting together an ad hoc committee to talk about that topic as well as recreation programs.

I've had a few people come forward to volunteer.

I hope to have that up and running in the next four to six weeks if I can. And certainly the building in its current condition, its current use, the future use and all that will be discussed in detail. However, I don't think we should ignore safety issues in the interim. We should deal with those as we see fit.

MS. BURKE-JONES: Exactly. I believe that if there's some obvious issues that do need to be dealt with, I think railings is an obvious issue, but I'd like to make sure that we talk about that at our next meeting.

MAYOR LICASTRO: Give me some time to meet with Dave Maund and have him go through Mr. Orel's e-mail and other suggestions to see what we can do.

MR. BENJAMIN: In addition to some of the issues regarding stairs, hand railing and there were some masonry issues and rusted out railings and things like that, can we also -- and, again, I understand we are going to have to look at this in short-term, medium-term, long-term, what can we afford.

MS. BURKE-JONES: We're talking short-term right now.

MR. BENJAMIN: Right. Short-term improvements, you know, the painting of the area by the back door has been -- the molding, the parapet, get it sanded and painted, if our Service Director can look at it, maybe that's something that can be done in-house. It would improve the aesthetics and how it looks especially to the residents that live in that neighborhood. That's their front door. That's our front door. To walk up and see it look in that condition --

MS. BURKE-JONES: Just one second.

Getting back to review the issues, discussion, I believe you had asked for an estimate for painting for this building. And I don't know if we did get around to getting an estimate for painting.

MAYOR LICASTRO: I don't know.

MR. BENJAMIN: I don't remember.

MS. BURKE-JONES: We did not receive anything, so I think --

MAYOR LICASTRO: I think the what to approach that, as Keith mentioned, if we can do it in-house, it's certainly a lot cheaper than going out to bid.

MS. BURKE-JONES: Some of those contracts like, you know, the whole parapet, it's a large job you may have to get a contractor to do. Where doors, et cetera would be --

MR. BENJAMIN: The doorway, all of that should probably be done in-house. As a matter of fact, Gina and I jokingly volunteered to do it ourselves. (Laughter.)

MS. BURKE-JONES: I'm writing that down right here.

MS. HUFFMAN: I call it the community project. (Laughter.)

MS. BURKE-JONES: Okay.

MS. HUFFMAN: It's a community project.

MAYOR LICASTRO: How are you with the trowel?

MR. BENJAMIN: Not great, but Gina is pretty good at it.

MS. BURKE-JONES: You had a comment.

MR. OREL: The fire door that's -- I guess it's the weight room now, this is just for your information, you know, to replace that wood door with another wood door of that same type you're talking about a $3,000 door just for the door. That doesn't include the hardware. That doesn't include the threshold. That doesn't include anything. That's just the door. So keeping that painted and protected, because the paint is falling off it. It's mostly bare wood at this point.
MS. BURKE-JONES: Right. And the review of the building and the status of the building, they really deal mostly with the exterior, but it seems there's a great deal of paint that was gone and the wood was decaying.

MS. MEADE: Would there be enough leftover material from Bratenahl Road to resurface the community center parking lot, because it's pretty bad.

MS. BURKE-JONES: You are next on the list. Also, we had mentioned about the problem with the community center parking lot. It's something that would be really important.

MAYOR LICASTRO: To answer her question, no, there wouldn't be enough leftover materials. The question was would there be left over materials from resurfacing Bratenahl Road to resurface the Bratenahl Community Center parking lot. The answer is absolutely not.

MR. BENJAMIN: Mayor, do we have a recent estimate on the cost to do a mill and fill?

MR. BIERUT: Not that I can recall. I don't know if Joe did one or not. It certainly can be developed quickly.

MS. BURKE-JONES: Can we take a look at those who are on the rec commission to think of anything you foresee in the future.

MR. BENJAMIN: Add it as an alternate so if possible, through a grant writer.

MS. HUFFMAN: That's right.

MS. BURKE-JONES: And we asked for that to be a discussion item for Committee of the Whole back half a year ago or more.

MR. BENJAMIN: Would it be included, again, as a bid alternate, but just to get a current price on it, not you know, obviously there are higher priorities. Public streets are a higher priority.

MR. BIERUT: It can be easily done.

MR. BENJAMIN: Add it as an alternate so we know what the average cost is.

MS. BURKE-JONES: Yeah, because I know a lot of people have issues of getting to the handicap locations. The pavement is just not acceptable between the handicap parking and the door, so getting that fixed would be great.

MS. HUFFMAN: Chairwoman, I have a comment.

MS. BURKE-JONES: Yes.

MS. HUFFMAN: So as we're talking about this building, it occurred to me that if I'm not mistaken, Public Improvements made a recommendation for painting and tuckpointing at Village Hall, which hasn't happened. And council approved the dollars to do it for up to a number of dollars to do it; is that true? Am I misremembering?

MAYOR LICASTRO: We're putting that project on hold.

MS. HUFFMAN: But did council approved that project?

MR. BENJAMIN: We never appropriated the money.

MS. BURKE-JONES: But yes, we did approve it.

MR. BENJAMIN: But through the committee process, we made a motion to recommend.

MS. BURKE-JONES: Right.

MAYOR LICASTRO: But it was never appropriated.

MS. HUFFMAN: Okay.

MR. BENJAMIN: Right.

MAYOR LICASTRO: Ms. Burke-Jones.

MS. BURKE-JONES: We just got through -- there's a few other issues here we'll probably need to move forward with in further funds. We also had asked that the Committee of the Whole review the -- look into us getting other funds, if possible, through a grant writer.

MS. HUFFMAN: Once you're done, I know you're ready to go to council, but I just want to make a couple more comments. That if you consider that the Public Improvements or even Committee of the Whole work with the rec center, because we're talking about all these things that the rec center needs.

And as I said in the past it occurs to me that it seems like there's a consensus that this building is a building that the community wants to keep, so it needs to have a rebirth. Of course, some of you heard me say that and that's what I'll continue to say. I think the Committee of the Whole and rec and rec and/or Public Improvements work together, we need to have some activities or events that raise money for this building to help with continuing expenses or anything you foresee in the future.

So I do want to put that out there for those who are on the rec commission to think.
about that, because I've given it great thought.
And hopefully Chairwoman considers having an
outside meeting to talk about things like a
casino night or derby night to raise money so
that they can go into the coffers of this
building if this building is to have a proper
rebirth. Those are my comments.

MS. BURKE-JONES: Thank you, Ms.

Huffman. There was a question. Go ahead.

FEMALE VOICE: I'm just wondering if you
can give me any status on the dog park.

MS. BURKE-JONES: I believe there was an
estimate. We asked for an estimate of how much
it would cost for shrubbery. I believe that --

MR. BENJAMIN: I think Councilman
Yonchak at the council meeting requested an
estimate from the Shade Tree Commission; is that
correct?

MR. YONCHAK: Shade Tree Commission,
yes.

MS. BURKE-JONES: As I understand Jeanne
did contact you.

MR. YONCHAK: I spoke with Jeanne. She
said the problem with it just installing
shrubbery is you can't get a backhoe in there to
build a mound on top of the mound.

MS. BURKE-JONES: Interesting. That's a very interesting concept,
Isn't it? That's where we stand at the moment.

FEMALE VOICE: What has happened then
since 2020 and now when there were 17 trees
tagged to be planted back there? I mean, nothing
-- there's been no obstacles popping up since it
was going to happen.

MS. BURKE-JONES: I don't know about the
17 trees.

MAYOR LICASTRO: I don't recall that
being a specific.

FEMALE VOICE: I can send you.

MAYOR LICASTRO: I'm thankful you do,
but I don't remember that being discussed nor
approved.

Ms. Goyanes: Why can't we just lock the
gate. The police can lock the gate, they can
unlock the gate, you know.
MR. GALESTOCK: They can also put up a sawhorse for that access road saying it’s closed.

MAYOR LICASTRO: You can’t do that.

Someone lives at the end of that road.

MR. GALESTOCK: You're right. I have a question when you're done.

MS. BURKE-JONES: Honestly, too, I think, of course, it's not dealing with today, but the whole Village Hall police station design and actually moving through the design process, there's going to be a redesigning of the whole Village Hall park aerial, which is going to have ramifications for even the dog park I would imagine.

MAYOR LICASTRO: If the levy passes, where are we going to build it, the exact location, how it affects the rest of the park, all of that is subject to dialogue which will come if the voters approve the monies and we know what we have.

MS. BURKE-JONES: Exactly.

MS. GOYANES: In the meantime, can we lock the gate? That's a simple solutions.

FEMALE VOICE: It's 35 months since I first brought this up and asked for help, but nothing gets done.

MR. YONCHAK: Is there an issue with locking the gate?

MS. MEADE: No.

MAYOR LICASTRO: I don't know.

MR. YONCHAK: It sounds reasonable.

MS. GOYANES: It's a park. Lock the gate.

MS. BURKE-JONES: It seems to be a wise thing.

MS. GOYANES: We lock the tennis courts, don't we?

MS. MEADE: Yes.

MS. GOYANES: Tennis courts are locked. You have to have a key pad or a key to get in.

MS. BURKE-JONES: Can we find out if locking that is possible, John?

MAYOR LICASTRO: I can ask.

MS. BURKE-JONES: Great. Thank you.

MS. GOYANES: We will ask at the next meeting.

MS. BURKE-JONES: We're trying to close this meeting. I noticed we have a number of other topics here, but they can hold to our next meeting. I want to finish the questions here.
CERTIFICATE

I, Nancy L. Molnar, do hereby certify that
as such Reporter I took down in Stenotypy all of
the proceedings had in the foregoing transcript;
that I have transcribed my said Stenotype notes
into typewritten form as appears in the foregoing
transcript; that said transcript is the complete
form of the proceedings had in said cause and
constitutes a true and correct transcript therein.
